## *Enhancing Patient Recovery Through Multidisciplinary Excellence*

Assalamualaikum and warm greetings,

Welcome to the 1st Malaysian Perioperative Medicine Symposium: Enhancing Patient Recovery Through Multidisciplinary Excellence. I am grateful to Allah s.w.t. and to our dedicated organising and scientific committees drawn from diverse clinical and professional backgrounds across Malaysia.

Surgery is an essential part of healthcare. A structured perioperative care pathway such as enhanced recovery programme in reducing the risk of perioperative morbidity and mortality is a prerequisite for the full attainment of local and global health goals.

This inaugural symposium organised by the **Malaysian Perioperative Medicine Society**, in close collaboration with the **Malaysian Society Hepato-pancreato-biliary Surgeons** and the **Malaysian Society of Regional Anaesthesia** underscores our shared commitment to team-based care as well as patient-centred care.

Aligned with the symposium's theme, this event offers practical, evidence-based insights from esteemed local and international experts on enhanced recovery in surgeries such as Hepatobiliary, Colorectal, and Joint Arthroplasty. We believe these insights are highly transferable across other surgical specialties. Therefore, we would like to welcome everyone; junior doctors, trainees, surgeons of any specialty, anaesthesiologists, physicians, nurses, dietitians, physiotherapists, pharmacist and perioperative leaders, as well as hospital administrators and stakeholders from the Ministry of Health, Malaysia and non-governmental sectors.

This symposium serves as the best platform to gather all healthcare professionals under one roof to share their passion and enthusiasm in delivering the best care for patient undergoing major surgery to help patient achieve a complete recovery perhaps healthier than the patient ever felt before.
We wish you an inspiring and productive symposium.
Thank you for joining us.
